

R & R GROUP

We work in your world

Mission Statement

R & R Electrical Services Ltd was established in 1989, and formed by the current Directors, Ray Smith and Richard Franklin. In 1995 the company was acquired by the Bullough group for a period of three years. In 1998 the founder management team bought back the company and has since expanded, with the opening of an additional branch on the South Coast, at Poole in Dorset and the newly acquired Lemsford Mill Controls Site.

...technology that connects

The strength of the company comes from the close working relationship that exists between all employees. This strong team operation has enabled the company to grow from its original four personnel to its present day structure. This, coupled with the experience gained from working with extremely demanding clients, has made R & R an adaptable and responsive company with high regard for quality workmanship, training and Health and Safety.

The staff of R & R have extensive experience in the design, management, supervision and maintenance of electrical services across various sectors including:

Retail	Communication
Banking	Ministry of Defence

Typical projects range from £500 to £600,000 with sales of over £7 million per annum.

We have always shown a willingness to adapt to innovative design concepts and the ever changing technology within our industry. This coupled with our continually expanding practical experience, allows us to maintain a professional approach to deliver a quality product.

Quality Control

From the very first stages of development, through to design and then onto completion, R & R Electrical Services Ltd aim and purpose is quality driven. With this in mind, we hold regular monthly team meetings.

Therefore it is necessary for R & R Electrical Services Ltd to ensure that all employees of the Company are made aware of the requirements of this enabling document, since failure to do so may influence their sphere of operations. To pass on this information is a composite part of each employer and each service providers Contract of Services.

Where required, task-specific safe working procedures will be developed and strengthened, providing a consistent approach to various specialist operations and tasks carried out on behalf of the Company.

This Policy Document refers to all locations under control of the Company, and includes:

- Static premises, including office and administrative facilities
- Construction Projects
- Refurbishment/maintenance Projects
- Inspection, testing and commissioning

Particular emphasis will be placed on the formal assessment and recording of safety management requirements. These include Permit-to-Work controls at locations where there is public access or direct overlap with areas dedicated to the public. Also included is where utilities provide power adjacent to the location, including emergency services.

The Board of Directors, R & R Electrical Services Ltd encourages and requires contributions from employees of the Company in the on-going development of safety management procedures and controls. To this end, consultation involving the respective Duty Holder at pre-commencement and

post-completion will be included within meeting agendas.

In the interests of consistency, we encourage and promote the development of core safety management controls, but with the flexibility to ensure that the unique requirements of each individual project and activity may be formalised to take account of statutory and other elements, which will contribute to a safe working environment.

Health & Safety

The Directors of R & R Electrical Services Ltd, actively promote target standards for the management of health, safety and welfare with the same high degree of diligence, research, expertise and commitment that is applied to other corporate and individual duties.

Support staff responsible for acquiring and planning of projects will be trained to a standard in the management of health, safety and welfare, sufficient to enable them an understanding of incorporate and corporate safety management procedures and controls.

Operational staff managing and supervising locations, and projects on behalf of the Company will receive the necessary training and support to achieve targets which meet the corporate safety management programme and project-specific management standards.

All other independent contractors and specialist suppliers of goods or services, will be notified of the corporate requirements in respect of planning, co-ordination, management supervision and monitoring of safety management standards.

Procedure and control shall be subject to independent monitoring by means of audit and sampling techniques, formal reports shall be addressed to the directors responsible for safety.

Safety management awareness training shall be arranged to be relevant to the commensurate with tasks, operations and processes carried out on company projects.

Training and Motivation

The Directors of R & R Electrical Services Ltd place a high value on their successful training programme and over the years have seen the fruits of the system with apprentices graduating to electricians and electrical foremen, thus maintaining the high standards of workmanship demanded by the Company and their clients.

...knowledge through education

Over the past few years, we have formed a successful relationship with Havering Technical College and Bournemouth & Poole College, to whom we send our apprentices. The Colleges not only monitor our students but also keep us up to date on changes to electrical practices and regulations.

Recently we have also been involved with Krone UK to help develop and expand our Data Services Department. With personnel from the Company being sent to Krone for Data Comms training, we can safely say that our students are some of the best trained in the industry.

As a Company, we work very close with leading suppliers in both the electrical and data comms industries who offer ongoing training for their latest product developments.

R&R Services

R & R Electrical Services Ltd have a proven track record of specializing in electrical, maintenance, data and CAD services. We are committed to delivering the standard of services that keep our clients ahead of their respective markets. Our work practice and training evolves with our clients growth forming a lasting partnership.
